

cast

pendant lamp
design Büro Famos, 2016

model	cast
dimensions (dxh)	ø 10x13cm
materials	cast glass, black anodized aluminum
weight / packing vol.	1,8 kg / 0,002 m ³
switching	external
suspension	length 220 cm, black wire
protection class	I
protection degree	IP20
rated voltage	220-240V, 50/60Hz
light source	LED AC modul 10W/2700K 650lm dimmable
lifespan	50.000h
light colour	2700 kelvin

A compact LED light made of a solid glass with a black aluminum body. Suspended over a black wire rope with height adjustment, equipped with an LED module in AC technology and dimmable. The integrated frosted lens allows a virtually glare-free light. The radiation characteristics: direct light downwards, is particularly suitable for the illumination of table and counter. The unevenness, such as hammer finish, waves and small air inclusions are typical for the casting technique. These emphasize the artisan characteristics of the glass and contrast with the black anodized aluminum top.
