light output ratio	ca. 40%	ca. 40%	ca. 40%

CE

This surface mounted lamp is part of our *cyls* collection and it is available in three different sizes. The shades are available in 12 different fabric colours - no tools are needed for installation. All it needs are magnetic clips to install it on the white powder-coated mounting plate. The slight distance to the wall creates a floating impression. A high-quality PC film diffuser has a translucency of approx. 40%. In addition, we offer for our customers individually tailored sizes and alternative electrifications.
